

## Biology 10th Class English Medium Online Test

Sr	Questions	Answers Choice
1	International breeding between individuals for certain traits, or combination of traits is called as.	A. Variations B. Evolution C. Natural selection D. Artificial selection
2	Which is favourable variation in moths after industrial revolution?	A. Light colour B. Medium colour C. Dark colour D. None of these
3	Among following which is favourable variation in mouse?	A. Light coloured skin B. Medium coloured skin C. Dark coloured skin D. All of these
4	Variation selected for their transmission to next generation are:	A. Favourable B. Continuous C. Discontinuous D. None of these
5	It is the process by which the better genetic variations become more common in successive generations of population:	A. Variation B. Artificial selection C. Selective breeding D. Natural selective
6	Charles Darwin published a book "on the origin of species by means of Natural Selection" in:	A. 1858 B. 1859 C. 1889 D. 1890
7	We proposed the mechanism of organic evolution in 1838?	A. Charles Darwin B. Charles lyll C. Lamark D. Gregor Mendel
8	All living thing had been created in their current form only a few thousand years ago. This idea is known as:	A. Theory of special creation B. Evolution C. Variations D. None of these
9	It is change in characteristics of a population or species of organisms over the course of generations:	A. Replication B. Transcription C. Evolution D. Translation
10	In variation, the phenotypes shows a complete range of measurements from one extreme to the other is.	A. Discontinuous B. Continuous C. <sup>Both a and b</sup> D. None of these
11	Example of discontinuous variation is:	A. Blood group B. Height in Man C. Intelligence D. None of these
12	Variations show distinct phenotypes and phenotypes of such variations cannot be measured by:	A. Discontinuous variations B. Continuous variations C. Both a and b D. None of these
