

Biology Fsc Part 1 Online Test

Sr	Questions	Answers Choice
1	The cell walls of most bacteria have a unique macromolecule called.	A. Techois acid B. Lipoprotein C. Peptidoglycan D. Polysaccharide
2	Peptidoglycans absent in.	A. Eubacteria B. Cyanobacteria C. Archaeobacteria D. Gram negative bacteria
3	Bacterial pathogenicity is due to.	A. Cell wall B. Capsule C. Slime D. Cell envelope
4	Pili are made up of special protein called.	A. Pillin B. Flagellin C. Tubullin D. Myosin
5	A bacteria with single polar flagellumis called.	A. Atrichous B. Monotrichous C. Amphitrichous D. Lophotrichous
6	The bacteria in which tuft of flagella is present each of two poles are called.	A. Atrichous B. Lophotrichous C. Peritrichous D. Amphitrichous
7	If tuft of flagella is present only at one pole to bacteria then these are called as	A. Amphitrichous B. Lophotriches C. Peritrichous D. Monotrichoca
8	Curved or comma shaped bacteria are called.	A. Vibrio B. spirillum C. Spirochetes D. Bacli
9	A cube of eight cocci is termed as.	A. Tetrad B. Sarcina C. diplococcus D. Streptococci
10	A sequence of cocci is termed as.	A. Diplococcus B. saurian C. Streptococci D. Tetrad
11	Cell wall is absent in	A. E -coli B. Mycoplasma C. Vibrio D. Sprocket
12	Hepatitis C is caused by virus.	A. DNA -Non enveloped B. DNA Enveloped C. RNA non enveloped D. RNA enveloped
13	Pig could be the source of infection of hepatitis.	A. A B. B C. E D. C
14	Hepatitis is an inflammation if.	A. Stomach B. Pancreas C. Liver D. Kidney
15	Hepatitis 'B' is also called.	A. Delta Hepatitis B. Infectious Hepatitis C. Infusion Hepatitis D. Serum Hepatitis

16	Infectious Hepatitis is caused by.	A. HAV B. HBV C. HCV D. HDV
17	The single stranded RNA tumor viruses are.	A. Spiral B. Cubical C. Elongated D. Spherical
