

## Computer Science Ics Part 1 Online Test

Sr	Questions	Answers Choice
1	The temporary storage area within the CPU is called.	A. RAM B. DRAM C. ROM D. Register
2	The Cells of memory are logically organized into group of.	A. 8 bits B. 12 bits C. 4 bits D. 32 bits
3	The output of computer is.	A. Source code B. Object code C. Linked code D. Encode
4	Which one is faster.	A. RAM B. Cache C. Register D. Hard disk
5	Which one is not a type of ROM.	A. EPROM B. EEROM C. FROM D. PROM
6	_____ is a storage device.	A. CPU B. Clock C. BUS D. Floppy Disk
7	ALU performs followings action	A. Performs logic functions B. Control computer Operation C. Perform Arithmetic functions D. Both a and c
8	A set of instruction that run the computer is.	A. Hardware B. Software C. Document D. CPU's
9	Dat and programs not being used by the computer is stored in.	A. Cache B. Printer C. Primary Storage D. Secondary storage
10	The address of instruction under the process of execution is contained in.	A. Program counter B. current instruction Register C. Memory address Register D. Memory Buffer Register
11	An important characteristic of RAM is.	A. Read Only B. Not volatile C. Write only D. Volatile
12	Which of the following memory needs to refresh.	A. ROM B. PROM C. SRAM D. DRAM
13	Which memory is used to speed to the computer processing.	A. ROM B. Cache C. BIOS D. FRAM
14	Which component of CPU is responsible for interacting with primary memory.	A. BUS B. ALU C. Register D. Control Unit
15	Register that collect the results of computation are called.	A. Accumulator B. Storage C. Instruction pointer D. Storage Register
