

## Mathematics 9th Class English Medium Unit 11 Online Test

Sr	Questions	Answers Choice
1	Question Image	
2	The symbol used for parallel is _____:	
3	In a parallelogram congruent parts are:	A. Opposite sides B. Opposite angles C. Diagonals D. Opposite sides and angles
4	How many right angles are in parallelogram:	A. 1 B. 2 C. 3 D. 0
5	Bisectors of angles formed with any one side of a Parallelogram intersect each other at angle _____:	A. $15^\circ$ B. $30^\circ$ C. $60^\circ$ D. $90^\circ$
6	How many angles in right triangle are of $90^\circ$ :	A. 1 B. 2 C. 3 D. 4
7	Medians of a triangle are _____:	A. Parallel B. Concurrent C. Opposite D. Non-concurrent
8	_____ of rectangle are congruent:	A. Diagonals B. Heights C. Bases D. None of these
9	Diagonals of a rectangle are:	A. Equal B. Congruent C. Opposite D. None of these
10	Bisection means dividing in _____ equal parts:	A. One B. Two C. Three D. Four
11	Diagonal of Parallelogram divides it into two _____ triangles:	A. Congruent B. Not congruent C. Not equal D. None of these
12	Opposite sides are congruent in a _____:	A. Triangle B. Parallelogram C. Trapezium D. Rhombus
13	Bisectors of angle formed with any one side of a parallelogram intersect each other at angle:	A. $150^\circ$ B. $30^\circ$ C. $60^\circ$ D. $90^\circ$
14	In parallelogram _____ are congruent:	A. Opposite sides B. Opposite angles C. Opposite sides and angles D. Diagonals
15	Diagonals of a parallelogram do _____ of each other;	A. Bisection B. Trisection C. Trisection D. None of these
