Mathematics 9th Class English Medium Unit 12 Online Test

Sr	Questions	Answers Choice
1	Bisection means to divided the parallelogram into _____ triangles:	A. 5 B. 4 C. 3 D. 2
2	How many mid points a line segment has ?	A. 1 B. 2 C. 3 D. 4
3	The symbol _____ is used for line AB.	
4	The right bisectors of the sides of an obtuse triangle intersects each other:	A. Inside the triangle B. Outside the triangle C. On hypotenuse D. On any vertex
5	The right bisector of the sides of a right triangle intersect each other _____:	A. Inside the triangle B. Outside the triangle C. On hypotenuse D. None of these
6	The right bisector of the sides of an acute triangle intersects each other _____:	A. Outside the triangle B. Inside the triangle C. Hypotenuse D. At no point
7	The right bisectors of the sides of a triangle are _____.	A. Concurrent B. Congruent C. Parallel D. Perpendicular
8	Center of a circle is on the right bisector of each of its _____.	A. Chords B. Circumference C. Radius D. Centre
9	Bisectors of two exterior and third interior angle of triangle are:	A. Congruent B. Concurrent C. Parallel D. Perpendicular
10	The bisector of the angles of a triangle are _____:	A. Concurrent B. Parallel C. Congruent D. Perpendicular
11	A ray is called _____ of an angle, it bisects the angle:	A. Angle Bisector B. Perpendicular Bisector C. Median D. Altitude
12	Any point of the _____ of a line segment is equidistant from its end points:	A. Altitude B. Medians C. Angle Bisector D. Right Bisector
13	A line is called _____ of a line if it bisects perpendicularly.	A. Angle Bisector B. Perpendicular Bisector C. Median D. Altitude
