

Biology Fsc Part 1 Chapter 12 Online Test

Sr	Questions	Answers Choice
1	Animals that feed on plants are called.	A. Herbivores B. Carnivores C. Omnivores D. Filter feeders
2	The partly digested food in cockroach is temporarily stored in.	A. Crop B. Gizzard C. Rectum D. Stomach
3	The animals which eat both plants and animals are called.	A. Herbivores B. Carnivores C. Omnivores D. Filter feeders
4	In Cockroach the partially digested food is stored.	A. Rectum B. Gizzard C. Crop D. Colon
5	The animal which feed on other animals are.	A. Harbivores B. Omnivores C. Carnivores D. Detritivores
6	The animals which ingest food in liquid form are called.	A. Carnivores B. Filter feeders C. Fluid feeders D. Macrophageous feeders
7	In amoeba digestion is.	A. Intracellular B. Extracellular C. a and b both D. None of these
8	Certain types of whales are also.	A. Detritivore B. Fluid feeders C. Omnivores D. Filter feeders
9	The process of taking in food is	A. Digestion B. Ingestion C. Assimilation D. Absorption
10	Sleazing and swallowing type of macro phaseouts feeding is found in.	A. Aphids B. Hydra C. Mussels D. spotted dog fish
11	The process of taking in food is.	A. Digestion B. Ingestion C. Assimilation D. Absorption
12	Which are not omnivores.	A. Bears B. Dear C. Crows D. Plags
13	Organism that live upon or within another organism are called.	A. Predators B. Pests C. Parasites D. Hosts
14	Which one is a parasitic plant.	A. Pitcher plant B. Venus fly trap C. Dodder D. Sun dew
15	Carnivorous plants live in soils that are deficient in.	A. Potassium B. Oxygen C. Nitrogen D. Magnesium

16	In root nodules bacteria convert nitrogen into.	A. Ammonia B. Nitrate C. Urea D. Nitrite
17	Magnesium is an important nutrient ion in green plant as it is an essential component of	A. Cell sap B. Protean C. chlorophyll D. Glucose
