Sr	Questions	Answers Choice
1	The study of mechanical, physical and biochemical functions of living organisms is called what?	A. Taxonomy B. Hematology C. Thermodynamics D. Physiology
2	The study of the behavior and properties of matter is called what?	A. Physics B. Anatomy C. Cryptography D. None of these
3	The geological and chemical study of rocks is called?	A. Thermodynamics B. Taxonomy C. Hematology D. Petrology
4	The study of life-forms existing in former geological time periods	A. Taxonomy B. Paleontology C. Crptography D. None of these
5	The branch of chemistry dedicated to the study of the structures, synthesis, and reactions of carbon-containing compounds?	A. Organic Chemistry B. Hematology C. Thermodynamics D. Taxonomy
6	Study of the earth's oceans and their interlinked ecosystems and chemical and physical processes	A. Thermodynamic B. Anatomy C. Oceanography D. None of theses
7	The branch of medicine dealing with the nervous system and its disorders	A. Neurology B. Taxonomy C. Archaeology D. Mineralogy
8	The branch of physics concerned with the nucleus of the atom	A. Hematology B. Nuclear Physics C. Anatomy D. None of these
9	The study of biology at a molecular level is called?	A. Hematology B. Taxonomy C. Molecular Biology D. Cryptography
10	The study of chemistry, crystal structure, and physical (including optical) properties of minerals	A. Taxonomy B. Mineralogy C. Archaeology D. Hematology
