Sr	Questions	Answers Choice
1	What does a Barometer measure:	A. Geographical Imbalances B. Atmospheric Humidity C. Atmospheric pressure D. Water pressure
2	Which instrument is used of measuring arterial blood-pressure.	A. Sphygmomanometer B. Sphygmophone C. Spirograph D. son meter
3	Which technique of recording and interpreting the the electrical activity of the brain is used:	A. Electromegnetograph B. Electroencephalogical C. Electroencephalograph D. None of the above
4	Electroscope is used for measuring of:	A. Sine wave frequency B. Electric Current C. Electric charge D. Bate particles
5	Theodolite is used for measuring of?	A. Measuring temperature B. Surveying C. Keeping Score D. Measuring speed
6	Which instrument is used for determining speed s of aeroplanes and motor boats:	A. Tachometer B. Telescope C. Thermocouple D. Theodolite
7	Which instrument is used to measure very high temperature:	A. Barometer B. infrared pyrometers C. Eratosthenes D. Geiger-muller tube
8	The Fujita scale is used to measure which natural phenomenon:	A. Tornado wind-intensity B. Ultra-violet intensity C. Atmospheric ozone levels D. Tsunami volumes and heights
9	The Mercalli scale is a lesser known measure o what important natural phenomenon:	A. Earthquakes B. Humidity C. Typhoon wind strength D. Lighting strike frequency
10	What is measured by an interferometer?	A. Wavelength of light B. Atmospheric pressure C. Very high temperature D. Radioactivity
