

Everyday Science Online Test

Sr	Questions	Answers Choice
1	Kelvin is a unit of:	A. Temperature B. Power C. speed of ships D. Magnetic flux
2	Horse-power is a unit of:	A. Temperature B. Power C. Speed of ship D. Magnetic flux
3	Gay is a unit of:	A. Electric Charge B. Brightness C. Magnetic induction D. Absorbed does of radiation
4	Dalton is a unit of:	A. Electric charge B. Brightness C. Magnetic induction D. Mass
5	Guss is a unit of:	A. Electric charge B. Brightness C. Magnetic D. Mass
6	Foot Candle is unit of:	A. Charge B. Brightness C. Magnetic Induction D. Mass
7	Decibel is a unit of:	A. Luminous intensity B. Electric dipole moment C. Temperature D. Intensity of sound
8	Debye is a unit of:	A. Luminous intensity B. Electric dipole moment C. Temperature D. Intensity of sound
9	Celsius is a unit of:	A. Luminous intensity B. Electric dipole moment C. Temperature D. Intensity of sound
10	Candela is a unit of:	A. Atmospheric pressure B. Electric current C. Intensity of sound D. Luminous intensity
