Sr	Questions	Answers Choice
1	What is the unit of electrical energy?	A. Ampere B. Volt C. Watt D. Kilowatt- hour
2	Farad is a unit of:	A. Magnetic Flux B. Electrical Capacitance C. Electrical conductivity D. Electromotive Force
3	Joule is a unit of:	A. Energy B. Temperature C. Power D. Impuse
4	Lux is a unit of:	A. Luminous Flux B. Illumination C. Luminous Intensity D. Focus
5	Which unit is used to measure the ozone:	A. Debye B. Dyne C. Dobson D. Siegbahn
6	Bar is a unit of:	A. Atmospheric Pressure B. Electric current C. Intensity of Sound D. Luminous intensity
7	Newton is a unit of:	A. Force B. Acceleration C. Work D. Energy
8	What is a Torr?	A. Density unit B. Power unit C. Acceleration unit D. Pressure unit
9	Who invented the first practical steam engine?	A. Edison B. Simpson C. Ford D. Watt
10	Who invented the internal combustion engine:	A. Ford B. Otto C. Benz D. Diamler
