Sr	Questions	Answers Choice
1	Which particle of atom has a positive charge:	A. Proton   B. Neutron   C. Electrons  D. None of these  
2	What the particles of an atom are?	A. Neutron, electron, and Proton   B. Photon and electron   C. Photon, electron, and neutron   D. Proton and electron  
3	Which of the following contains high content of lead?	A. Low octane fuel   B. High octane fuel   C. Cooking gas   D. Coal  
4	Uranium eventually decays into a stable isotope of?	A. Lead   B. Polonium   C. Thorium   D. Radium  
5	Rusting of iron requires:	A. Oxygen only   B. Oxygen and carbon dioxide   C. Oxygen and water   D. Carbon dioxide only  
6	A balloon filled with helium rises in air because:	A. Helium pushes down on the air below the balloon   B. The balloon is weightless  C. Air exerts an upward force on the balloon  D. Helium is less dense than air  
7	Which one of the following is the softest?	A. Iron   B. Lithium   C. Silicon   D. Sodium  
8	Which one of the following is used in the preparation of antiseptic solution?	A. Iodine   B. Iodine   C. Potassium Chloride   D. Potassium nitrate  
9	Which gas is used for converting vegetable oils into saturated fats?	A. $H_2$  B. $O_2$  C. $Si_2a$  D. $SO_2$ 
10	Which of these substances contains no oxygen?	A. Cryolite   B. Bauxite   C. Dolomite   D. Epsom salt
