

## Computer Science Ics Part 1 Chapter 2 Online Test

Sr	Questions	Answers Choice
1	Which topology uses multiple star topologies	A. Tree B. Ring C. Star D. None
2	Which of the following topology uses routes	A. Star B. Ring C. Mesh D. None
3	The physical layout of LAN is known as	A. Topology B. Hub C. Link D. None
4	Many network includes a central computer that is called	A. Server B. Bridges C. Gateway D. None
5	How many pairs of computers can simultaneously communicate on Ethernet LAN	A. 1 B. 2 C. 3 D. Multiple
6	Which one of the following is a LAN protocol	A. Ethernet B. Token ring C. ARC net D. All
7	NIC allows direct connection to	A. Internet B. Network C. Printer D. Modem
8	A network that transmits data over citywide distance faster than LAN is	A. WAN B. LAN C. MAN D. PAN
9	Which type of network is the internet	A. LAN B. MAN C. WAN D. Done
10	Crossing one LAN to another LAN is done over	A. Bridges and gateway B. Routers C. Backbones D. MANs
11	A LAN is a combination of	A. Network adapter cards B. LAN cables C. LAN application software D. ALL
12	Which of the following is not a component of LAN	A. Cable B. Gateway C. Bridge D. Modem
13	LAN stands for	A. Local area nodes B. Logical arrangement of network C. Local area network D. Linked area network
14	Each computer on a network is called a	A. Bus B. Server C. Node D. None
15	A collection of computer connected together is called	A. Processing B. Network C. Chatting D. Centralized
