

Computer Science Ics Part 1 Chapter 5 Online Test

Sr	Questions	Answers Choice
1	The address of instruction under the process of execution is contained in.	A. Program counter B. current instruction Register C. Memory address Register D. Memory Buffer Register
2	An important characteristic of RAM is.	A. Read Only B. Not volatile C. Write only D. Volatile
3	Which of the following memory needs to refresh.	A. ROM B. PROM C. SRAM D. DRAM
4	Which memory is used to speed to the computer processing.	A. ROM B. Cache C. BIOS D. FRAM
5	Which component of CPU is responsible for interacting with primary memory.	A. BUS B. ALU C. Register D. Control Unit
6	Register that collect the results of computation are called.	A. Accumulator B. Storage C. Instruction pointer D. Storage Register
7	ALU has _____ units.	A. 2 B. 3 C. 4 D. 5
8	CPU includes all of the components except.	A. Primary storage B. ALU C. Register D. Control Unit
9	The term that refers to all input, output and secondary storage devices is.	A. Central B. Network C. Attached D. Peripheral
10	The Brain of computer that execute the instruction is called.	A. RAM B. CPU C. Mother board D. System Unit
11	The idea of starting a program in memory was given by	A. Dr. Abdul Salam B. Pascal C. Dr. Abdul Qadir D. John, Von Neuman
12	Which is the fastest memory?	A. CPU B. RAM C. Cache D. None of these
13	Which is called the brain of computer?	A. CPU B. RAM C. Motherboard D. None of above
14	Which of the following is not type of bus?	A. Data bus B. Time bus C. Address bus D. Control bus
15	The order of stack is;	A. FIFO B. LIFO C. GIGO D. FIGO
