1 The break statement is used to exit from which part of a loop? 2 The initialize expression and increment expression are contained in the loop expression in a B Middle CD None of the above 3 A multiple statement while loop is terminated with a	Sr	Questions	Answers Choice
The initialize expression and increment expression are contained in the loop expression in a C. Do-while loop D. Mathematical while loop D. Semicolon  A :	1	The break statement is used to exit from which part of a loop?	B. Middle C. End
A multiple statement while loop is terminated with a  B. Right bracket C. Coma D. Semicolon  A: B. C. Compound statement  C. Binary statement  B. While statement  C. Do-while statement  D. Continue statement  D. Continue statement  D. Continue statement  C. Using a do-while statement	2	The initialize expression and increment expression are contained in the loop expression in a	B. For loop C. Do-while loop
4is used to separate the three parts of the loop expression in a for loop	3	A multiple statement while loop is terminated with a	B. Right bracket C. Coma
The lonc variable is initialized  B. Outside the loop C. Either inside or outside the loop D. At the end of loop A. Relational operators B. Assignment operators A. Relational operators B. Assignment operators B. Assignment operators C. Logical operator D. Both A and B  To associate a group of statements with the while statement enclose them between a pair of C. () D. " "  The statement associated with the while statement can be a  In case of programing when you want to do something a fixed number of times then which of the following statement is used?  The method by way of which we can repeat a part of program is  B. Outside the loop C. Either inside or outside the loop D. At the end of loop A. Relational operators B. Assignment operators C. Logical operator D. Both A and B A. {.} B. {} C. () D. " " A. Unary statement B. Compound statement D. Ternary statement D. Ternary statement C. Do-while statement D. Continue statement D. Continue statement D. Continue statement D. Using a for statement D. Using a do-while statement C. Using a while statement C. Using a while statement	4	,,,,,,,,,is used to separate the three parts of the loop expression in a for loop	B. ; C. "
The condition being tested may use which of the following operations?  B. Assignment operators C. Logical operator D. Both A and B  To associate a group of statements with the while statement enclose them between a pair of C. () D. "  "  A. Unary statement B. Compound statement C. Binary statement D. Ternary statement D. Ternary statement D. Ternary statement D. Ternary statement D. Continue statement D. Coon while statement D. Coon while statement D. Continue statement D. Using a do-while statement D. Using a while statement D. Using a while statement	5	The lonc variable is initialized	<ul><li>B. Outside the loop</li><li>C. Either inside or outside the loop</li></ul>
To associate a group of statements with the while statement enclose them between a pair of C. () D. "  "  A. Unary statement B. Compound statement C. Binary statement D. Ternary statement D. Ternary statement D. Ternary statement D. Continue statement C. Do-while statement D. Continue statement D. Using a for statement D. Using a do-while statement D. Using a while statement D. Using a while statement	6	The condition being tested may use which of the following operations?	B. Assignment operators C. Logical operator
The statement associated with the while statement can be a	7	To associate a group of statements with the while statement enclose them between a pair of	B. {} C. ( )
In case of programing when you want to do something a fixed number of times then which of the following statement is used?  B. While statement C. Do-while statement D. Continue statement  A. Using a for statement  B. Using a do-while statement  C. Using a while statement  C. Using a while statement	8	The statement associated with the while statement can be a	B. Compound statement C. Binary statement
The method by way of which we can repeat a part of program is  B. Using a do-while statement C. Using a while statement	9		B. While statement C. Do-while statement
	10	The method by way of which we can repeat a part of program is	B. Using a do-while statement C. Using a while statement
